

accordance with said remodulated second signal to reduce the magnitude of said second signal therein.

44. (New) Apparatus according to claim 41, wherein said subsequent use comprises processing a signal derived from said uplink signal in accordance with said parameter to reduce the magnitude of said second signal therein.

45. (New) Apparatus according to Claim 40, wherein the third component is configured to subtract said estimated interference signal.

REMARKS

The above amendments are made to place the claims in a more traditional format.

Respectfully submitted,

NIXON & VANDERHYE P.C.
